

RITCHHEY ROAD LOGIC

The Road Logic offers a riding experience that's steeped with more than 40 years of frame-building heritage, innovation, exploration, and lots of riding. The classic lines of this beautiful steel frame unite with modern building techniques and proven materials to deliver a contemporary bicycle that's wonderfully comfortable for long days in the saddle, nimble and stiff enough to win the sprint for that sign, and adequately adaptable to endure roads that might lack proper pavement.

The frame is built with a heat-treated and triple-buttressed Ritchey Logic tubeset designed for the Road Logic, and features aggressively short-buttressed sections optimized for TIG welding that save weight and improve ride quality. The tried and true specs on the frame remain unchanged, but an exciting new Slate and Gold paint scheme and fresh logo treatment replace the Skyline Blue to give the frame a more contemporary look, matching the style seen on the new Swiss Cross.

- Sizes: 49, 51, 53, 55, 57, 59cm
- Heat-treated, triple-buttressed Ritchey Logic tubeset
- TIG-welded
- Ritchey Full Carbon Fork
- 700x30c tire clearance (depending on tire/rim manufacturer)
- Headset: WCS drop in 1-1/8" (included)
- Weight: 1.77kg (55cm - frame-only)
- Color: Slate & Gold
